YOUR PROBLEMS

"You Behaved Like a Cad . . ."

Dear Ann: I'm in my first year of college and in dire need of help. My steady girl and I agreed when I went off to school we would both date others. During Easter vacation I dated my former steady and also another girl who is a close friend of hers.

Girl Number Two didn't have the high standards of my former steady and we became intimate after a couple of dates. I know it was wrong, and I'm particularly ashamed because she never meant anything to me. I don't plan to date her again.

Now my former steady has started to write very warm letters. She says she's beginning to think of me as THE man in her life. In her last three letters she asked what went on during vacation between me and the other girl.

I've ignored the question as I don't want to damage a reputation. At the same time, she may know more than I think and if I don't level with her she may cool off on me. Please help. — A TROUBLED STUDENT

You are a brass-plated, four-door heel to have used the girl so shabbily. Your statement that "her standards weren't as high as the other girl's" was interesting. What about YOUR standards, Bub? Do you raise and lower them like an elevator, according to the company you keep?

The confession that the girl never meant anything to you supports what I've been trying to drill into the heads of teenage girls. If a fellow has respect for a young lady he won't try to sell her on such shenanigans.

You behaved like a cad. Don't compound the felony by blabbing. Continue to ignore the written question. If she confronts you in person, tell her she's out of order, and what went on with you and third party is none of her business.

Dear Ann: My wife is a school teacher. We've been married 15 years and have four children. She tells me she's happiest when she's teaching school or attending night classes to advance her education.
